

CSS: Save as tables.css

Create an external style sheet that contains the following styles and link it to your table website. You might need to add elements to your html page first.

- Define your H1 tag as **blue**, 30px
- Define your LI tag as a **lighter blue**, 16px
- Define the text color for the entire body of your document as **grey**, 12px
- Define your links as **red**, 12px, and underlined
- Define your visited links as **pink**, 12px, and underlined
- Define your rollover links with a **red background, white text, padding 2px, no underline**
- Create a class that sets the background color to **green**. Use this class in 2 TD tags.
